Discount vs Average Revenue

PERFORMANCE SUMMARY

The online shop generated 2.99M in actual revenue from 42,721 completed and paid orders, with an average order value of 69.99.

Electronics generated the highest revenue, while Accessories recorded the highest number of units sold. Tehran was the highest-value city, and Regular customers were the highest-value customer segment.

Revenue remained relatively stable during 2024 and 2025 but declined during the first half of 2026.

Cancelled and returned orders accounted for 8.01% of orders, while 3.85% of payment attempts failed.

Higher discounts did not significantly increase the number of units purchased and were associated with lower average revenue.

DATA CLEANING & PREPARATION

- Removed 120 exact duplicate order records.
- Removed records with missing Order Date and Quantity because these fields were required for the analysis.
- Removed 25 records with invalid quantities of zero or below.
- Missing Discount values were treated as 0, representing no discount.
- Missing Payment Method and other unmatched categorical customer information were labelled as "Unknown".
- Missing customer Age values were filled using the median age of 41.
- City names were standardised to correct inconsistent spelling and formatting.
- Missing Payment Date records were removed from the payments data.
- The four datasets were joined using CustomerID, ProductID and OrderID.
- Unmatched records were retained where appropriate and clearly identified as "Unknown".
- Only Completed and Paid orders were counted as Actual Revenue. Cancelled, Returned, Failed and Refunded transactions were excluded from Actual Revenue. After cleaning and joining the data, the final analysis dataset contained 49,860 rows.

BUSINESS RECOMMENDATIONS

- PRIORITISE HIGH-VALUE PRODUCTS** Focus on strong revenue-generating products such as Headphones, Office Chairs and Tablets. Electronics should remain a key focus, while high-volume Accessories can be used for cross-selling opportunities.
- REVIEW THE DISCOUNT STRATEGY** Higher discounts did not significantly increase the number of units purchased, while average revenue decreased as discounts increased. Use targeted promotions and smaller discounts rather than relying on large discounts.
- INVESTIGATE THE 2026 REVENUE DECLINE** Investigate the decline in revenue during the first half of 2026. Review product, customer and operational performance during this period and work to reduce cancellations, returns and failed payments.
